

BNJ FOUNDATION  
**FISCAL YEAR 2021**

Dear Friends,

On November 23, 2021, we celebrated our eleventh anniversary.

2021 continue to be an extremely challenging year and one we will never forget. The world is struggling trying to find solutions to the health crisis. Scientists are working 24/7. We are so grateful to these scientists, healthcare providers and all volunteers all around the world for their humbling support.

Just as many non-profit organizations, we continue to struggle to help those that needed help. We watched as the world continue to cancel events, we cancelled our health campaign, feeding etc. We are so grateful not only for our volunteer's health care providers that helped patients day and night in fulfilling the needs of the people we serve. We will forever be grateful. We continue to make donation to several organizations.

We collected healthcare items Hand sanitizers, masks and others and distributed in rural areas.

We pray and hope to start our activities in the upcoming year as we continue to solicit and raise funds in our efforts to sustain and develop even more programs. We want to thank all who have and wish to support us either through donations or our volunteer program.

Lastly, we thank our amazing and gracious international health care providers and supporters, for their courageous and amazing support. We all are committed to serve and assist people in need with honor and respect.

With our sincere gratitude,

Memouna B. Wallace, MD

Executive Director
