

BNJ FOUNDATION  
**FISCAL YEAR 2022**

Dear Friends,

On November 23, 2022, we celebrated our twelfth anniversary.

2022 was a better year as the world is slowly getting back to normal. With the removal of nearly all COVID-19 restrictions and the reopening of business and international borders in most countries, we started our health campaign back. We went home to home educating families on sanitary measures, checking blood pressure, testing blood sugar, and distributing sanitary items, and meal packages.

Just as many non-profit organizations, we continue to struggle to help those that needed help. We are so grateful not only for our volunteer's health care providers that helped patients' day and night in fulfilling the needs of the people we serve. We will forever be grateful. We continue to make donation to several organizations.

We collected healthcare items Hand sanitizers, masks and others and distributed in rural areas.

We pray and hope to start our activities in the upcoming year as we continue to solicit and raise funds in our efforts to sustain and develop even more programs. We want to thank all who have and wish to support us either through donations or our volunteer program.

Lastly, we thank our amazing and gracious international health care providers and supporters, for their courageous and amazing support. We all are committed to serve and assist people in need with honor and respect.

With our sincere gratitude,

Memouna B. Wallace, MD

Executive Director
